

Sprint Goal:

Database setup

Front End set up

Connection between database and front end

Experimentation with options for generative framework

End-of-sprint Deliverable:

By the end of this sprint we would like to have a front-end and backend that responds to basic service requests and begin experimenting with language models for the open-ended prompts.

Team Capacities:

Harper:

- Base: 8 hours (inclusive of in class work time)
- English paper due: -0.5 hour
- Work shifts: -1 hour
- Final: 6.5 hours

Eddie:

- Base: 8 hours
- Working on dev after work - Varies
-

JD:

- Base: 8 hours
- Rehearsals/shows every night - 2 hours
- Final: 6 hours

Planned User Stories and Tasks:

1. [Create django database](#)
2. [Create basic frontend](#)
3. [Create Migrations for Db](#)
4. [Async Servicing](#)
5. Experiment with generative frameworks
